

Eroth — Privacy Policy & Terms of Use

Last updated: December 2025

This document describes how **Eroth**, the Discord bot, handles data, content, and user interactions. By using Eroth, users agree to the policies listed below.

1. Data Handling Overview

Eroth follows a **minimal-data, privacy-respecting model**. The bot only stores what is strictly necessary for its economy, collection, and moderation features.

1.1 Message Content

- **Not stored.** Eroth reads message content only to process commands.
- No message logs or transcripts are retained.

1.2 Metadata (Stored)

Eroth stores limited metadata required for bot operation: - **User ID** (to track inventories, levels, balances) - **Server ID** (to separate server-based data) - **Channel ID** (log events, cooldowns, moderation logic) - **Timestamps** (for cooldowns and technical logs)

1.3 Attachments

- **Not collected or stored.**

1.4 Slash Commands

- Eroth does **not** use slash commands.
- Only **text-based commands** are used.

1.5 Error Logs

- Errors are **ephemeral**.
 - They are **not stored** beyond the moment they are displayed.
-

2. User Data & Account Changes

2.1 Account Deletion

If a Discord user deletes their Discord account:

- Discord permanently deletes the associated user ID.
- All bot-linked data (inventory, balances, stats, etc.) becomes **irreversibly orphaned and unusable**.
- Eroth performs automatic cleanup when encountering invalid IDs.

2.2 Manual Data Deletion Requests

Users may request deletion of their own data via:

- A **support ticket** on the main Discord server.

Deletion includes:

- Economy data
- Inventory & item data
- Collection progress
- Levels and stats
- Any stored preferences

This is irreversible.

3. Bot Features & Data Stored for Them

3.1 Economy System

Eroth includes a fake-currency game system. Stored data includes:

- Balances
- Inventories
- Tradeable items
- Level/XP progress

3.2 Preferences

Stored per-user settings, such as:

- **Inventory privacy** (public or private)

3.3 Trading

- Users may trade **in-game items only**.
- **No real-money trading** is allowed.
- Attempting real-money trade leads to moderation action.

3.4 Moderation

Eroth includes lightweight moderation features:

- Logging of userID, serverID, channelID, timestamps
- Blacklist system to prevent users from interacting with the bot

3.5 Support & Tickets

- Tickets opened in the main server may log user IDs and timestamps for service purposes.
-

4. NSFW/Ecchi Content Rules

Eroth supports **16+ ecchi content**, and this is **a core feature of the bot**, not optional.

4.1 Allowed Content

- Ecchi
- Risqué, flirtatious, or suggestive content
- Characters **who are adults** and depicted as adults only

4.2 Minors or Minor-Perceived Characters

- Characters who appear underage or are canonically minors **may appear** (e.g., from MyAnimeList scraping), **but they are never included in any 16+ scenario, command, or depiction**.
- They are restricted to **SFW-only contexts**.

4.3 Strict Enforcement

- Violations result in user blacklist or server warning.
-

5. External Scraping (MyAnimeList)

Eroth uses **scrapers** to collect publicly available images from MyAnimeList: - Used for collectible cards, game items, levels, etc. - Only publicly accessible content is scraped. - No private or paid-access content is collected.

6. Premium / Paid Features

Eroth offers optional benefits to supporters: - Patreon/Kofi donors receive small bonus features - Discord server boosters also receive perks

Notes: - Donations support development and hosting - Perks never include NSFW content unlocks beyond the standard 16+ features

7. Professional & Legal Notes

7.1 Intent

Eroth is designed as a **fun, entertainment-focused** Discord bot, but all operations follow: - GDPR-compatible data minimization principles - Discord's Terms of Service - Applicable digital content laws

7.2 Legal Responsibilities

Server owners and moderators remain responsible for: - Complying with Discord ToS - Ensuring their server is age-appropriate for enabling NSFW/ecchi commands

8. Additional Gameplay Information

8.1 Collectible Card System

Users can: - Collect anime-themed cards - Level them up - Trade with other players - Use them in certain economy/game commands

Images are sourced from MAL scrapers (Section 5).

9. Contact / Support

For data deletion, bug reports, or questions: - Use the **support ticket system** in the main Discord server.

10. Acceptance of Terms

Using Eroth constitutes agreement with this Privacy Policy & Terms of Use. If you do not agree, please refrain from using the bot.
